Expand Your Business with a Universal Laser System!

With a Universal laser system, you can cut, etch and engrave almost anything. From awards, glassware and frames to signs, rubber stamps and scrapbook items, a Universal laser system gives you the flexibility to expand your business beyond simply engraving. The possibilities are endless.

You can cut, engrave and mark detailed, intricate patterns or shapes quickly and cleanly with a variety of materials, including wood, acrylic, glass, plastic, vinyl, rubber and fabric.

ULS offers a full line of laser systems that run from standard graphic software programs, such as CorelDRAW®. With table sizes ranging from 24x12 to 36x24, you're sure to find the laser system that suits your needs.

To learn how a Universal laser system can help you expand your business, call 1.800.859.7033 or visit www.ulsinc.com.
